Hologram Sticker Labelling Machine

The UTO LAB 150/250/350 HT is an automatic high-speed roll-to-roll labelling machine designed for precise application of hologram, promotional and security labels on various label and film rolls used in packaging applications.

The machine features an advanced microprocessor-controlled label dispensing system with a user-friendly sensing mechanism, ensuring accurate and consistent label placement. Depending on label size and repeat length, the system can achieve speeds of up to 150/250/350 labels per minute.

An optional model is also available for applying L-shaped security labels on both sides of cartons, making it suitable for pharmaceutical, FMCG and cosmetic packaging applications.

Technical Specification

Label Height : 10 mm to 100 Standard*

Label Length : 12 mm Minimum

Label Roll Dia. : 350 mm

Core Dia. : 75/76 mm

Gap Between two Labels : appx. 3 mm or more

Product Diameter : 15 mm to 85 mm*

Electrical : 220 VAC Single Phase Power Supply (50/60 Hz)

Speed : Up to 150/250/350 Labels per minute depending on Repeat Length in Roll and Label Size.

Overall dimension : 1280 mm(L) X 800 mm(W) X 1750 mm (H)

Optional Features

- Label Roll Empty - Machine Stop System with Alarm
- Missing Label in Roll - Machine Stop System with Alarm
- Tower lamp showing the machine status / operation
- Checking Presence or Absence of Label.
